

Green Communities
Webinar Series

April 9, 2015

COMMONWEALTH OF MASSACHUSETTS

Charles Baker, Governor
Matthew Beaton, Secretary
Dan Burgess, Acting Commissioner

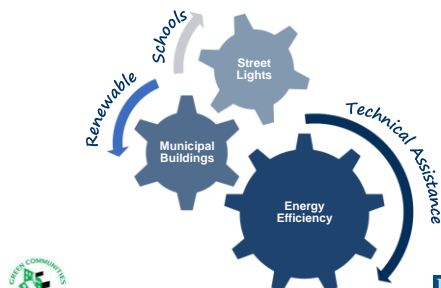

Establishing a Baseline to Become a Green Community

Seth Pickering
Aimee Powelka
Green Communities Division

1

Green Communities Division

The energy hub for **all** Massachusetts cities and towns,
not just designated "Green Communities."

Helping Massachusetts Municipalities Create A Cleaner Energy Future

2

Outreach - Regional Coordinators

- Regional Coordinators act as direct liaisons with cities and towns on energy efficiency and renewable energy activities
- Located at each of the DEP Regional Offices:

West - Springfield
Jim Barry
Jim.Barry@state.ma.us

Northeast - Wilmington
Joanne Bissetta
Joanne.Bissetta@state.ma.us

Central - Worcester
Kelly Brown
Kelly.Brown@state.ma.us

Southeast - Lakeville
Seth Pickering
Seth.Pickering@state.ma.us

Helping Massachusetts Municipalities Create A Cleaner Energy Future

3

Green Communities Division - Programs & Resources for Municipalities

- Green Communities Designation and Grant Program
- MassEnergyInsight energy tracking and analysis tool
- Municipal Energy Efficiency Assistance
- Energy Management Services Technical Assistance
- Mass Municipal Energy Group (MMEG)
- Website filled with tools & resources:
www.mass.gov/energy/greencommunities

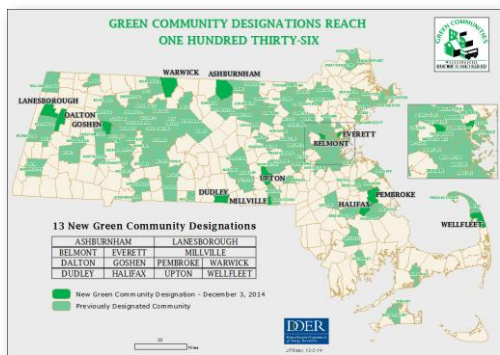

Email updates via e-blasts – Sign up by sending an email to:
join-ene-greencommunities@list.serve.state.ma.us

Helping Massachusetts Municipalities Create A Cleaner Energy Future

4

Helping Massachusetts Municipalities Create A Cleaner Energy Future

5

Designation & Grant Program

- Grant allocations based on a \$125,000 base plus a population/per capita income formula
 - Maximum of \$1 million
 - Range from \$130,725 in Hatfield to \$1 million for Boston
 - Granted approximately \$40 million to implement energy efficiency and renewable technologies
- Projects include energy conservation measures, performance contracts, solar PV, incremental costs of hybrid vehicles.
 - 137 grants complete to date** (84 designation and 53 competitive)
 - Grants \$25.4 million
 - Total Projects Costs \$41.1 million; utility incentives \$8.4 million
 - Annual savings of \$6.9 million**
 - Annual Energy Savings = Approximately 1,535 MA homes
 - Annual GHG Reduction = Nearly 3,138 cars off the road

Helping Massachusetts Municipalities Create A Cleaner Energy Future

6

Participate in the Clean Energy Revolution

Key Steps to Becoming a Green Community:

1. Organize an Energy Committee
2. Contact your Regional Coordinator
3. Get trained on MassEnergyInsight
4. Contact your utility about an audit
5. Talk to other municipalities in your region

Helping Massachusetts Municipalities Create A Cleaner Energy Future

7

Designation & Grant Program

Qualification Criteria: Designation

1. Adopt as-of-right siting for RE/AE generation, R&D, or manufacturing
2. Adopt expedited permitting process
3. **Create an Energy Reduction Plan (ERP) to reduce energy use by 20% in 5 years**
4. Purchase only fuel-efficient vehicles
5. Minimize life cycle cost in new construction → adopt the Stretch Code

Grant Funding

1. Energy Efficiency Projects
2. Renewable Energy Projects on municipal land

Helping Massachusetts Municipalities Create A Cleaner Energy Future

8

Poll Question

- Is your community considering applying to become a designated Green Community this fall?
 - Yes
 - No
 - Not Sure
 - Not Applicable

Helping Massachusetts Municipalities Create A Cleaner Energy Future

9

Establishing A Green Communities Energy Baseline

Who? When? What? Why? How? Where?

Helping Massachusetts Municipalities Create A Cleaner Energy Future

10

Who Is Included in the Baseline?

- o **All** Municipal Divisions and Departments
 - o Municipal Buildings
 - o School Buildings
 - o Municipal & School Vehicle Fuel Use
 - o Street and Traffic Lights
 - o Drinking Water & Waste Water Treatment Plants
 - o Pumping Stations
 - o Open Space = Parking Lots, Cemeteries, Parks & Athletic Fields

Helping Massachusetts Municipalities Create A Cleaner Energy Future

11

Enterprise Fund Divisions/Departments

- Enterprise Funds
 - May be excluded from the Baseline/ERP *if* they have a separate governing body or are third-party operated
 - DOER strongly encourages that these operations be **included** in the Baseline/ERP
 - *If included, they are eligible for grant funding*

Helping Massachusetts Municipalities Create A Cleaner Energy Future

12

Regional School Districts

- Elementary Schools are usually included in the Green Community Baseline and ERP
- Regional Middle & High Schools with students from multiple towns may be included in GC Designation Applications to become eligible for grant funding
- To be included in the Baseline a Regional School must:
 - Establish the individual school's Energy Baseline
 - Use the municipality's funding assessment percentage to determine the portion that will become part of the Green Community municipality's Energy Baseline
 - Funding assessment percentage does not affect amount of grant funding available to a school or regional school district; town's choice
 - RSD must adopt the ERP and Fuel Efficient Vehicle Policy

Helping Massachusetts Municipalities Create A Cleaner Energy Future

13

Municipality Homework

- Contact all Departments
 - Outreach and information sharing to all departments starts with:
 - Gathering energy use information
 - Education and support around vehicle fuel usage
 - Identifying energy efficiency opportunities
 - Promoting potential grant fund availability
 - The local Bill Paying Accounting/Cost Centers are the best sources of Baseline energy information for both usage and costs

Helping Massachusetts Municipalities Create A Cleaner Energy Future

14

What Energy Usage is included in the Baseline?

Helping Massachusetts Municipalities Create A Cleaner Energy Future

15

Baseline Energy Usage = From What?

- Buildings
 - Electricity & Fossil Fuel
- Vehicles
 - Gasoline Usage
 - Diesel Fuel Usage
- Street Lights, Traffic Lights & Open Space
 - Electricity
- Water Treatment Plants/Municipal Services
 - Electricity & Fossil Fuel

Helping Massachusetts Municipalities Create A Cleaner Energy Future

16

Poll Question

- What is the energy unit used in Green Communities' energy baselines?
 - kWh
 - MMBtu
 - Both of the above
 - Joules

Helping Massachusetts Municipalities Create A Cleaner Energy Future

17

Trick Question

- BOTH kWh and MMBtu are used in creating an energy baseline, but the baseline is measured in MMBtu.
- **MMBtu** stands for one million British Thermal Units (Btu). A Btu is a measure of energy content. It is the amount of heat required to increase the temperature of one pound of water by one degree Fahrenheit.
- MMBtu is a common unit of measurement applicable to all energy types

Helping Massachusetts Municipalities Create A Cleaner Energy Future

18

How is the Baseline Measured & Calculated?

- The energy use baseline inventory must be provided in MMBtu (Million British Thermal Units).
- Use the following tools:
 - DOER's MassEnergyInsight (MEI) (www.massenergyinsight.net)
 - Energy Star Portfolio Manager
 - School Dude software
 - Other tools proposed by the municipality and deemed acceptable by DOER
- Preferred method is MEI for a Green Communities Designation Application

Helping Massachusetts Municipalities Create A Cleaner Energy Future

19

Poll Question

- Is your municipality currently using MEI?
 - Yes
 - No
 - Don't know

Helping Massachusetts Municipalities Create A Cleaner Energy Future

20

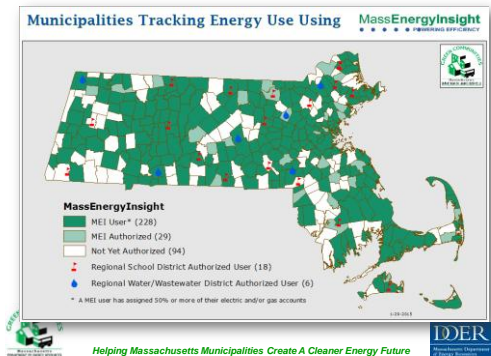

MassEnergyInsight is...

A web-based tool fine-tuned for municipal energy data management, analysis, and reporting.

Helping Massachusetts Municipalities Create A Cleaner Energy Future

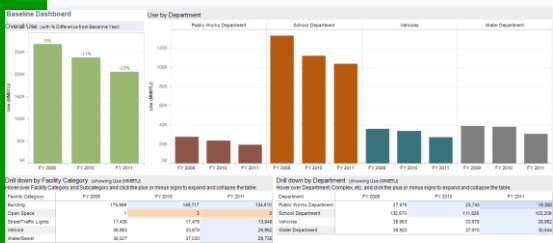

Join the MEI Crowd

Helping Massachusetts Municipalities Create A Cleaner Energy Future

Baseline Dashboard

Helping Massachusetts Municipalities Create A Cleaner Energy Future

24

MEI Energy Baseline Process

- Identify account numbers and energy usage
- Become MEI authorized
- Watch training video(s)
- Set up "tree" structure of facilities and departments (optional)
- Assign accounts to facilities
- Assign category and subcategory to facilities
- Load gasoline, diesel, propane, oil usage
- Ensure electric and gas usage has loaded

Helping Massachusetts Municipalities Create A Cleaner Energy Future

MEI Authorization Documentation

- Authorization Documents on Letterhead
 - Municipality = Signed by chief elected or appointed official
 - Schools = Signed by chief appointed official
- Municipality/Schools Data Sharing Documents on Letterhead
 - Municipality = Signed by chief elected or appointed official
 - Schools = Signed by chief appointed official
- Examples
 - Available from your Regional Coordinator

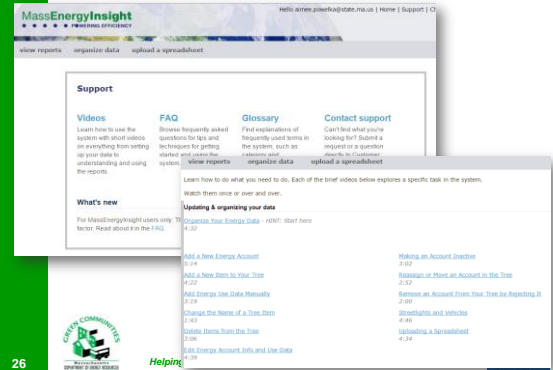

Helping Massachusetts Municipalities Create A Cleaner Energy Future

25

MEI Training = Support Videos

26

MEI Set-Up

- Think about how you wish to use your data
 - Reporting to each department?
 - Only reporting to DOER?
 - Both?
- This will determine how to set up your accounts in MEI
- All accounts need to be assigned to a Category in MEI

Helping Massachusetts Municipalities Create A Cleaner Energy Future

27

Setting Up Your MEI Accounts

- Ames (City, Town, or Reg. Entity)
 - Ames Elementary School (Facility) ← No department reporting
 - 123456789 (Account)
 - propane (Account)
 - building 1 (Facility)
 - Fire Department (Department) ← Department-level reporting
 - Fire Station 1 (Facility)
 - Fire Station 2 (Facility)
 - Fire Station 3 (Facility)
 - Fire Station 4 (Facility)
 - Fire Station 5 (Facility)
 - Fire Station 6 (Facility)
 - 987987 (Account)
- Goal: All accounts under a facility

Helping Massachusetts Municipalities Create A Cleaner Energy Future

Making MEI Information Useful

- Ames (City, Town, or Reg. Entity)
 - 555555 (Account) ← Account not under facility
 - Ames Elementary School (Facility)
 - 123456789 (Account)
 - propane (Account)
 - Fire Department (Department)
 - 1123456 (Account) ← Account not under facility
 - Fire Station 1 (Facility)
 - Fire Station 2 (Facility)
 - Fire Station 3 (Facility)
 - Fire Station 4 (Facility)
 - Fire Station 5 (Facility)
 - Fire Station 6 (Facility)
 - 987987 (Account)
- Goal: All accounts under a facility

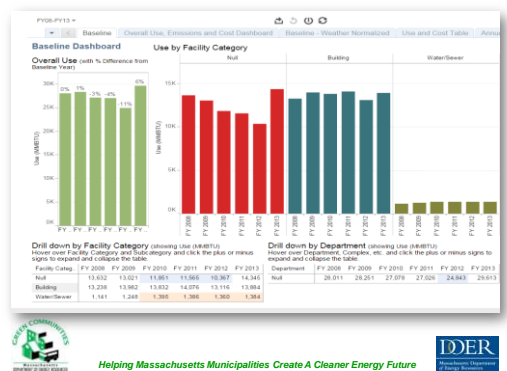

Helping Massachusetts Municipalities Create A Cleaner Energy Future

29

Null Data = Information Not Useful

Helping Massachusetts Municipalities Create A Cleaner Energy Future

Assigning a Facility Category

- Assign Category
- Subcategory options depend upon category
- See Glossary for help
- Exclude from Baseline – usage you would like to track and monitor, but is not included in your energy baseline, such as rental properties

31

Helping Massachusetts Municipalities Create A Cleaner Energy Future

These tables show you how many facilities you have created by facility Category and Subcategory. To expand or collapse the table, hover over the category header or the name of a specific item, then click the plus (+) or minus (-) symbols.

Assign these accounts: These accounts have not been assigned to a complex, building or unit. Assign these accounts to ensure their data is reported properly.

Assign a category to these items: Buildings listed here may be improperly categorized or excluded in the reports.

Assign a subcategory to these items: Buildings listed here will not be able to be compared to similar building types.

Enter a square footage for these buildings: Buildings listed here will not show property in the Buildings to Target report.

Assign these schools a School Type: This will allow you to compare them to similar schools in the School Benchmarks report.

Adding Your Energy Data

- Only need the utility account number assigned – usage will be loaded for you
 - Electricity
 - Natural gas
- Usage you need to load
 - Oil
 - Propane
 - Gasoline
 - Diesel
- Type into MEI or load a spreadsheet
- Competitive Supply for accurate cost

33

Helping Massachusetts Municipalities Create A Cleaner Energy Future

Check - Is Your Usage in MEI?

Data Loaded? Overview: This report shows whether or not data is loaded for a given account and period. Green indicates data loaded; blank cells indicate no data loaded or no meter read that period. Accounts with an orange cell in the 'Fuel' column have no data loaded for that account. To view accounts with no data loaded, be sure to include 'Fuel' under 'Year' in the column on the right.

Works: Transfer Station, Sampleville Municipal Electric, Electric, Transfer Station, Sampleville Municipal Electric, Electric, Transfer Station, Sampleville Municipal Electric, Electric.

34

Helping Massachusetts Municipalities Create A Cleaner Energy Future

Once Upfront Work Is Done.... Energy Tracking is Much Easier

- Share the success of your clean energy projects
- Build communication around energy use and budgets
- Monitor your overall energy use and costs
- Identify inefficient facilities
- Compare your facilities to your peers
- Report to DOER

35

Helping Massachusetts Municipalities Create A Cleaner Energy Future

When? What year can be the Baseline Year?

- For a Fall 2015 application you have the following choices:

- FY2013
- CY2013
- FY2014
- CY2014
- FY2015

36

Helping Massachusetts Municipalities Create A Cleaner Energy Future

Which Year to Choose?

- Which Year Depends Upon:
 - How much time you would like to pursue the 20% reduction using grant funds
 - FY13 baseline; ERP timeframe is FY14-FY18
 - FY14 baseline: ERP timeframe is FY15-FY19
 - Designation FY16
 - Any prior energy efficiency projects completed
 - Amount of reductions from those projects
- Contact your regional coordinator to make sure the logic for your baseline is sound

Helping Massachusetts Municipalities Create A Cleaner Energy Future

37

Example: Baseline Year Choice

- FY13 28,000 MMBtu (20% is 5,600 MMBtu)
- FY14 32,000 MMBtu (20% is 6,400 MMBtu)
- Energy efficiency projects in spring 2013 (FY13)
 - Lighting upgrade in all school
 - projected energy savings is 150,000 kWh
 - 512 MMBtu = 1.8% of FY13
 - Boiler replacement in one school is 20,000 therms
 - 2,000 MMBtu = 7.1% of FY13
 - If only lighting, town may wish to use FY14 baseline to gain more time after designation to reduce usage
 - If only boiler, or both boiler and lighting, town may wish to use FY13 baseline because they believe usage will decrease in future (perhaps FY14 was a tough winter)
